

### Vestment Advisors, Inc. – *Breaking Barriers, Building Business*

Have you ever considered that managing a business is as complicated as keeping a fleet of racecars in top condition? Let's face it, any business today, even the smallest ones, have a lot of moving parts. They are all interconnected and moving at top speed. In order for your business to run smoothly, safely and swiftly you need to make sure all the parts are in the right place, doing the right job, and taking your business where you want it to go.

Just like driving a racecar, managing a business is much easier as a spectator sport. The hard work comes in the pit, when a skilled team must change the tires, provide the fuel, and address deficiencies quickly, efficiently and correctly so the driver can get back on the track to win the race. One false move can be deadly.

Your business is no different. You need a skilled team with the proper tools and training to make sure you can survive your race and win your trophy. One false move on your part can be costly, too.

With so much at stake for principals and other stakeholders, businesses need to do what racecar drivers do: turn to skilled coaches and consultants who bring the "know-how" that is necessary to win the race. This includes an experienced professional who knows all aspects of winning the business race.

Although there are some coaches who focus just on driving, or just on car design, the most valuable coaches and consultants are those who know all aspects of winning the business race. Vestment Advisors is unlike any other coaching or consulting firm because we understand every aspect of your business. We provide our business owner clients with a complete "bumper-to-bumper" system so they can drive their business safely and swiftly.

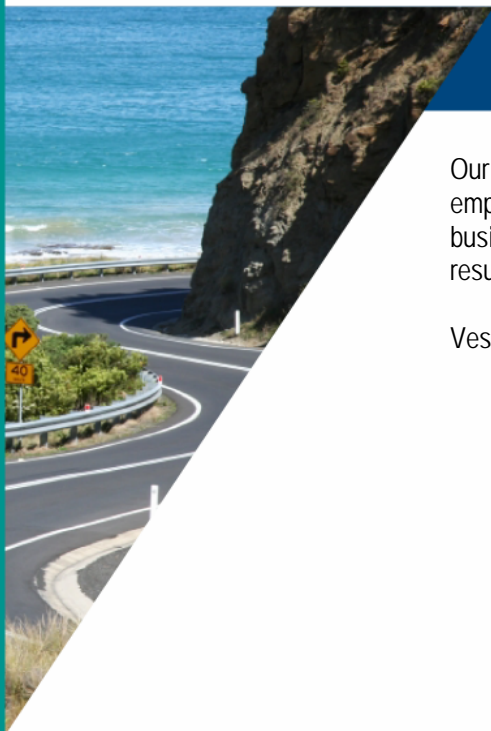

We are unique in that our capabilities are broader than the typical consultant or coach. Rather than focusing our attention on one area of business development, we offer clients an unrivaled menu of services that address all eight business disciplines, including sales and client experience strategies, fiscal management, strategic marketing, organizational development, human resources, technology, compliance, and strategic planning. While some consultants can only address one or two of these disciplines, Vestment Advisors can address all of your challenges, helping you turn your business into a well-oiled business machine.

Vestment Advisors brings a team of diverse, talented individuals who relentlessly pursue the common goal of making our relationships with clients an easy and rewarding experience. Collectively, we bring more than 70 years of business development experience to your team, so your pit crew can become the fastest in the business.

Our passion for what we do comes from the success of our clients, stakeholders, and employees. That passion infects every one of our clients with the understanding of their business challenges and the hope they can quickly get their business to top speed. The result: we become our clients' trusted pit crew and they win the race.
